

Rise to the Challenge

SUPPORT OUR \$1 MILLION CHALLENGE AND
HELP US DOUBLE YOUR GIFT

**MORGAN
MEMORIAL
HOSPITAL**

It's an exciting time for healthcare in Morgan County. Our vision for a new, modernized community hospital is close to becoming a reality.

But first, we need your support. From a small donation to a legacy gift honoring a loved one, every contribution matters. Now through February 15, 2016, your gift can have an even greater impact, thanks to the generosity of an anonymous donor. As part of a \$1 million Challenge Grant, **all gifts—including pledges—will be matched dollar for dollar if we reach our fundraising goal.**

Please give today to help secure our hospital's future while leaving a lasting imprint on our community. **For more information or to make a donation, contact Megan Morris at meganm@mmh.org or (706) 752-2237.**

Building Now for Our Future.

Giving made easy

- Pledges can be spread over three years.
- Naming opportunities begin at \$5,000 and provide a lasting tribute.
- Contributions can be made via cash, check, credit card or stock transfers.
- All donations are tax deductible.

Your gift can have a lasting impact

Did you know?

The new hospital is expected to create 84 new jobs and generate an additional \$3.8 million in economic impact.

Each year, Morgan Memorial Hospital is there for hundreds of patients and families in their time of need. Whether providing routine medical care or lifesaving emergency treatment, MMH plays a vital role in our community. Your support will help ensure MMH is here for generations to come.

With the construction of a new, “right-sized” hospital, MMH will continue its legacy of caring. In addition to providing the technology and amenities today’s patients expect, a new hospital will allow MMH to remain competitive in a time of enormous change for hospitals. Some of the features planned for the new hospital include:

- *Modern operating rooms designed to meet today’s standards*
- *Private patient rooms and bathrooms*
- *Updated ER with private exam rooms*
- *Modern technology and equipment*
- *Energy-efficient, environmentally sustainable systems*

With the new facility, MMH will continue to build its collaboration with Athens Regional Health System—adding new specialties and services that will allow patients to receive more of their healthcare close to home. Once complete, patients will have local access to:

- *Expanded capabilities in many specialties, including cardiology and gastroenterology*
- *New and expanded services in ophthalmology, orthopedics, gynecology, urology and ENT*
- *Minimally invasive surgical services including laparoscopic, endoscopic and arthroscopic procedures*
